## COURSE DIRECTORS

**Sergio BOTTERO**

**Angelo GHIDINI**

The idea of a new “formula” concerning our annual meeting on pediatric airways is born as a natural consequence of several national and international courses, thanks to the collaboration and friendship between the ENT Department of University of Modena and Reggio-Emilia and the Airway Surgery Unit of Bambino Gesù Children Hospital of Rome. In the last seven years we were able to bring new ideas into the field of pediatric airway surgery in Italy and now we are ready to organize a new and more modern concept of meeting thanks also to the presence of some of the most skillful and expert pediatric surgeons in the world. Every year we are going to plan a different topic regarding pediatric airway diseases, both congenital and acquired and, as usual, the meeting will be held one year in Rome and the other in Reggio Emilia. We hope that our efforts will be appreciated by everyone who is going to decide to attend. Looking forward to meeting everyone in Reggio Emilia next year.
